OUTDOOR WOOD FURNITURE CARE AND MAINTENANCE

Australian summers are notoriously harsh especially if your wooden furniture is kept in direct sunlight, ongoing maintenance of your teak outdoor furniture is necessary to keep it's tone, this will help it continue to look good and ensure the longevity of the piece.

Our outdoor timber products come pre oiled. To ensure the ongoing care of your outdoor wood furniture we suggest using:

<https://www.haymespaint.com.au/products/product-information/view/Decking-oil>

Featuring an advanced formulation to repel water, mould, algae and UV rays. Simply Woodcare Exterior Decking Oil preserves and protects timber from the destructive effects of weathering. The oil-enriched formulation penetrates to nourish the timber while providing a protective barrier to prevent future deterioration of the timber.

The hotter the climate and the more exposure to the sun the furniture has will determine how often you should oil your furniture, without oil treatment the timber will turn a subtle silvery grey overtime.
